

ETERNYTIME LIVE

Real-time results, lap-by-lap details, archives, Analytics, Remote TV, tablet apps and TV graphics for your broadcasts.

ETERNYTIME LIVE supports every type of timed event: endurance, sprint, karting, motocross, quad, car, motorcycle, cycling, timed runs, Time Attack and Superpole. The platform turns timing data into public pages that are readable, shareable and useful for drivers, teams, speakers, race control and spectators.

Spectators access current live events and archives through the global platform directory. They can search for an event, open a race, view a competitor, then expand lap-by-lap data directly from the driver or team row.

LIVE ANIMATION

Race replay

A dynamic view: rankings, gaps, best laps and competitor progress are stopped to make the live experience more engaging.

MONDIAL DU QUAD

Race 3

Light web-optimized version: animated lap chart replay.

Clear rankings for every race format

Timing data is published online with a presentation designed for spectators and teams: position, number, competitor, category, laps, total, gaps, last lap, best lap and race status.

- ✓ Real-time rankings for time-based races, lap races, sprints and endurance events.
- ✓ Time Attack and Superpole mode: running clock on the main Live Results screen, best lap, drivers on track, runs and dynamic standings.
- ✓ Click a driver or team row to open the detailed profile and lap-by-lap history.
- ✓ Race control messages and official documents visible during the event.

Search across the whole platform

The Live directory helps spectators find current live events, recently completed events and archives. Search works across the platform by race name, event, venue, folder or organizer.

01

Current live events

The public finds active races from one common page, without needing the exact address in advance.

02

Consultable archives

Live events are not deleted. After the race, a snapshot is kept so drivers can still access their results.

03

QR Code and direct link

The organizer shares a QR Code on posters, social media, paddock areas, ticketing and competitor documents.

04

Official documents

Official PDFs published after validation can be displayed and shared with the public from the Live environment.

Comparaison multi-pilotes

#1 NX Concept | #2 PSR-By Rapport | #3 TH Handy

The chart displays lap times for three riders over 60 laps. The y-axis represents time in minutes and seconds, ranging from 3:20.574 to 8:59.549. The x-axis represents the lap number, from 1 to 60. Three data series are shown: #1 NX Concept (red), #2 PSR-By Rapport (yellow), and #3 TH Handy (cyan). The chart shows significant fluctuations in lap times, with several sharp peaks. The highest peak occurs at lap 55, where the time reaches approximately 8:59.549. Other notable peaks occur at lap 10 (approx. 6:10.062), lap 25 (approx. 6:34.805), lap 45 (approx. 4:45.318), and lap 60 (approx. 4:45.318).

Lap	#1 NX Concept	#2 PSR-By Rapport	#3 TH Handy
1	4:45.318	4:45.318	4:45.318
10	6:10.062	6:10.062	6:10.062
25	6:34.805	6:34.805	6:34.805
45	4:45.318	4:45.318	4:45.318
55	8:59.549	8:59.549	8:59.549
60	4:45.318	4:45.318	4:45.318

Overlay several competitors to compare pace, identify variations and tell the race story with readable curves.

Lap-by-lap CSV

Select drivers, download the data and share a clean file for analysis, communication or event reporting.

Time Attack / Superpole

Show the running clock on the main Live Results screen, then highlight best laps, runs, drivers on track and gaps.

TABLET APPLICATIONS

Kiosk, online signature and administration

ETERNYTIME LIVE can be used on tablets for race control, speakers, official document validation and administrative transponder management.

Online signature available

The race director can validate and sign official results from a tablet interface. Once the document is validated, sending and publishing can be triggered quickly to reduce waiting time for drivers and teams.

The workflow is designed for the end of a race: sign, validate, publish, then leave the document accessible from the Live environment.

Android Kiosk application

Kiosk mode for speakers and race directors: dedicated screen, readable interface, stable display and notification as soon as a new official PDF is published.

Administrative application

Transponder distribution and return with barcode scanner: faster entry, fewer typing mistakes, competitor/transponder matching and direct synchronization with the timing organization.
